AIR HELPER SPRINGS | AIR COMMAND
COMMERCIAL-GRADE PRODUCT OVERVIEW

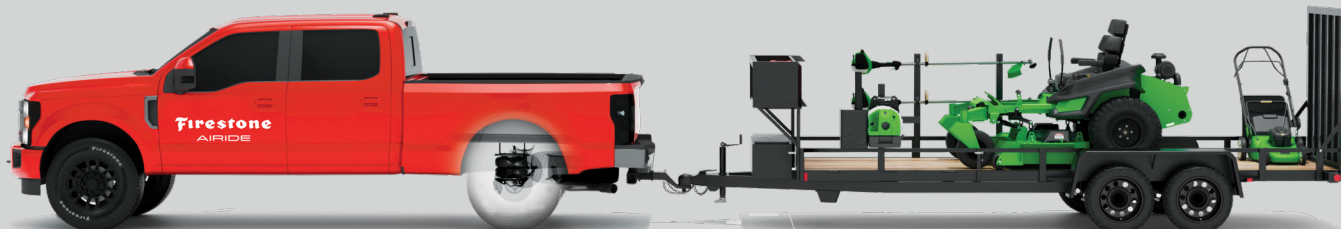

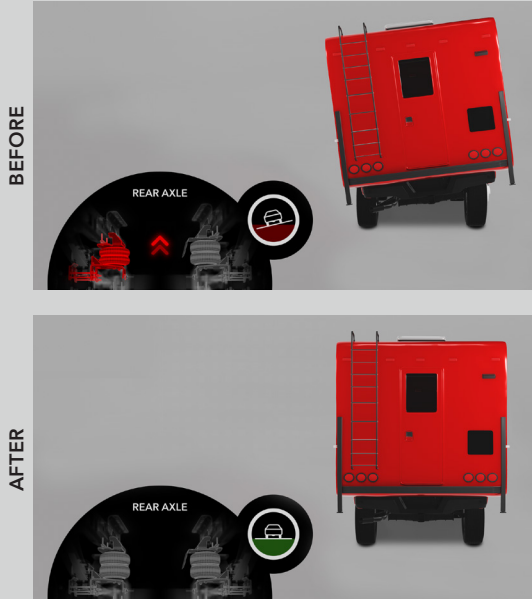

THE ORIGINAL AIR SPRING

MAKE LIGHT WORK OF HEAVY LOADS

FIRESTONE AIRIDE IS THE COMPLETE LEVELING SOLUTION FOR TOWING AND HAULING.

Air Helpers work by maximizing a vehicle's safe load-carrying capacity in most trucks. Paired with Air Command Single or Dual path wireless controls, Firestone Airide provides the complete solution to make towing and hauling a stress-free experience.¹

FINDING THE RIGHT WAY

SINGLE PATH OR DUAL PATH?

Firestone Airide is offered in two "paths" to better accommodate most towing and hauling situations.

Single Path Applications

Both air springs are connected. When adjusting inflation, the springs inflate and deflate in tandem. Ideal for most trailers and non-in-bed campers.

Dual Path Applications

Air springs are installed and operate independently of each other. Enjoy side-to-side adjustability for uneven loads in common situations like in-bed campers.

LEVEL UP YOUR PERFORMANCE

ADVANTAGES OF WIRELESS COMPRESSOR KITS

- Does away with the need to find an alternate air source to change the air spring's pressure.
- Instantly changes the air pressure through an easy-to-use interface.³
- Two (2) memory presets for quick access of your preferred air pressure settings.³
- Review and adjust the air spring's performance metrics.³

VISIT FIRESTONEAIRIDE.COM TO CONFIGURE YOUR AIR COMMAND SYSTEM.

¹ Airide does not change or fix a vehicle's ride quality in an unloaded condition, and does not modify a vehicle or require drilling into a vehicle's frame.

² On-board Compressor Kits are not required to operate the Air Helper Springs.

³ Air Command and Air Command Dual app-only.
